

SplitStack Project Source Code Manifest

Version: 1.0

Date: May 12, 2026

Source Code Location

The project source code is contained in the repository root:

```
cs4800-project/
```

Repository URL:

```
https://github.com/JuneauPlayz/cs4800-project
```

Main Source Directories

Path	Purpose
website/frontend/	React/Vite web client.
website/backend/	Express/SQLite backend API.
mobile-app/	Flutter mobile client.
docs/	Generated documentation for QA, technical design, deployment, and submission mapping.
planning files/	Existing project planning artifacts, requirements, use cases, business plan, prototypes, and architecture image.

Web Frontend Source

Path	Purpose
website/frontend/src/main.jsx	React entry point.
website/frontend/src/App.jsx	App composition entry.
website/frontend/src/views/AppView.jsx	Main UI screens and workspace rendering.
website/frontend/src/controllers/useAppController.js	State, form handling, polling, and workflow control.
website/frontend/src/services/api.js	REST API client.
website/frontend/src/services/sessionStorage.js	Browser session persistence.
website/frontend/src/models/appModel.js	Shared UI constants, initial state, and helper functions.
website/frontend/src/styles.css	Web UI styles.

Backend Source

Path	Purpose
website/backend/src/server.js	Starts the Express server.
website/backend/src/app.js	Configures middleware, static receipt serving, routes, and error handling.
website/backend/src/routes/api.js	REST API route map.
website/backend/src/controllers/	HTTP controllers for auth, groups, expenses, votes, challenges, budgets, and workspace operations.
website/backend/src/services/	Business logic for auth, groups, expenses, votes, analytics, assistant, receipts, budgets, and shared helpers.
website/backend/src/middleware/auth.js	Bearer-token authentication middleware.
website/backend/src/config/env.js	Environment-variable loading.
website/backend/src/db.js	SQLite connection, schema bootstrap, migrations, and local data setup.

Mobile App Source

Path	Purpose
mobile-app/lib/main.dart	Flutter entry point.
mobile-app/lib/src/app.dart	Main Flutter app shell.
mobile-app/lib/src/core/app_theme.dart	App theme definitions.
mobile-app/lib/src/state/app_controller.dart	Mobile state manager and workflow controller.
mobile-app/lib/src/data/api_client.dart	REST API client for Flutter.
mobile-app/lib/src/data/models.dart	Dart data models for backend payloads.
mobile-app/lib/src/data/session_store.dart	Secure session and preference storage.
mobile-app/lib/src/data/receipt_ocr_web.dart	Web OCR interop path.
mobile-app/lib/src/data/receipt_ocr_stub.dart	Non-web receipt OCR stub.
mobile-app/lib/src/ui/auth_screen.dart	Mobile auth UI.
mobile-app/lib/src/ui/home_shell.dart	Main mobile workspace UI.
mobile-app/test/	Flutter unit/widget tests.

Source Code Submission Recommendation

Submit the full repository, including:

- website/
- mobile-app/
- docs/
- planning files/
- README.md
- RELEASE_NOTES.md
- lockfiles such as package-lock.json , pubspec.lock , and platform project files

Do not rely on only the planning files folder because the source code, test spec, build instructions, release notes, and generated design supplements live outside that folder.
